

**Prayas**

**A Mission To Reinforce Potentials Of Individuals With Autism Spectrum  
Disorders Towards Quality Education And Livelihood**

**Report- June 2011- May 2014**

**A Project of Autism Society of India**

# Dimensions of Effort

## Technology Based Early Intervention Educational Resource: [www.learn4autism.com](http://www.learn4autism.com)

**Around 90 individuals with ASD received training**

**Around 730 registered users from across the globe**

**More than 400 lessons uploaded which are  
equivalent to some 1000 hrs of learning\***

\*It may vary from individual to individual depending on their age and understanding.

## Workshops, Training Programmes and Replication

Trained around 280 parents and professionals through iPad Workshops and 90 parents through the monthly workshops.

Trained 40 professionals through Master Trainer Programme

Replicated Prayas in 4 centers in Bangalore, one in Coimbatore and 10 centers are in pipeline... These centers are in cities like Delhi, Mumbai, Kashmir, Dehradun, Bhopal, Thrissur and NOIDA\*

\*Replication Training programmes are scheduled from the month of May till July 2014

## App Development

Bol- iPad

Bol- Android

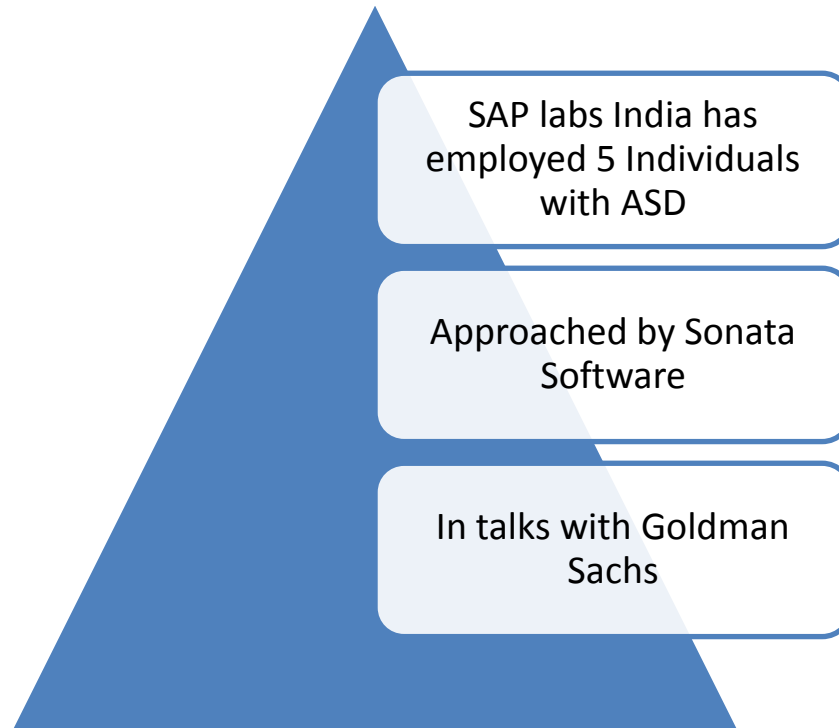

iKatha

iKatha

Bol, a communication app has been developed and is available as it Version 2 on iTunes, an android version of the same will be launched soon. iKatha is another social story app available at the iTunes store in its free version. This will be further developed in to another customisable app which can address the diversity of Indian Culture.

## Employment for Individuals with Autism Spectrum Disorders (ASD)

Challenges faced- The present education system in India is not equipped to deal with individuals with ASD, the present situation of ASD not accounted as a disability by the GOI makes it worse. The affected persons and their families are not able to exercise their rights of education etc.

## Summary
